***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent

2. Claims 1-7 are rejected under 35 U.S.C. 102(a) as being anticipated by applicant admitted prior art (hereafter AAPA).

Regarding claim 1, AAPA discloses a method for handling an interrupt request in an optical storage drive when the optical storage drive executes a control procedure or operation, the method comprising: utilizing the optical storage drive to receive an interrupt request from a control circuit (see [0005], Fig. 1); checking whether the interrupt request is a read command (see [0005]); if the interrupt request is a read command, checking whether data indicated by the read command is stored in a buffer (see Figs. 1-2 and there descriptions); and if the indicated data is stored in the buffer, transferring the corresponding data to the control circuit from the buffer to respond to the interrupt request (see Figs. 1-2 and there descriptions).

Regarding claim 2, discloses the method of claim 1, wherein the buffer is a volatile memory of the optical storage drive (see Fig. 1).

Regarding claim 3, discloses the method of claim 1, wherein the buffer is a register of the optical storage drive (see [0003]).

Regarding claim 4, discloses the method of claim 1, wherein the control circuit is a host computer (see Fig. 1).

Regarding claim 5, discloses the method of claim 1, further comprising: if the data indicated by the read command is not stored in the buffer, suspending handling the interrupt request (see Fig. 2).

Regarding claim 6, see rejection above of claim 1.

Regarding claim 7, discloses the storage medium of claim 6 being a non-volatile memory (see Fig. 1).
